Apple iMac 21.5" Retina 4K

The Apple iMac 21.5" retina hire provides Mac computing with a stunning 4K high resolution display available for short and long term rental.

The Apple iMac 21.5" retina desktop has a native resolution of 4096 x 2304 and an IPS screen supporting the wider P3 colour gamut with up to 25 percent more available colours to display. This single specification provides an ideal platform for video creation for digital cinema and also professional photography. Our rental models have as default the memory upgrade to 16GB RAM, coupled with a quad core core i5 @ 3.1GHz and a large 1Tb hard drive. Extensive expansion is through 2 thunder bolts 2 ports, 4 USB 3.0 ports and a Gigabit ethernet. This iMac 21.5" retina rental models are available to hire at short notice from 3 days to 1 year.
