## Apple Mac Pro

**The Apple Mac Pro, 6 core Intel Xeon 3.5GHz is the latest workstation from Apple and provides the ultimate in processing power and speed.**

With multiple processor cores and dual graphics card this Mac Pro is capable of dispatching demanding graphic and animation tasks with ease. Apple have reduced potential performance bottlenecks by design, with a Xeon 6 core CPU, 4 channel DDR3 memory up to 64GB, a PCIe based solidstate drive for OSX and 2 workstation class graphics cards. Multiple Thunderbolt connections allow additional displays, external storage and other peripherals to be connected including up to 3x 4K displays or 6 standard monitors. With Mac Pro hire available from Rent IT from just 3 days, we can offer a cost effective means of accessing this stunning product.
