Apple MacBook Pro 15" Retina

With a stunning high resolution Retina display, blistering fast 256GB flash memory and a full 16GB of DDR3L memory this 15" MacBook Pro looks impressive and has the performance to match whatever the challenge.

If you need a lightweight, portable solution for graphics, animation or just presentations, this quad core i7 MacBook Pro will not fail to impress. The addition of a 256GB solid state drive improves OS and program load times and a standard HDMI port enable easy connection to external monitors or projectors. With a battery life quoted to be up to 9 hours, a full days work can be covered from just one charge.
