Liebert 3KVA UPS

Rent IT's largest hire UPS system is the GXT3 3KVA Rack Mount UPS from Liebert.

With a full load run time of 5 minutes this unit can provide support against power outages for a number of computer systems and displays. This high power unit gives the vital extra time to cover minor power outages or fluctuations as well as giving operators a few minutes to undertake controlled system shut down in cases of total power failure. As an on-line UPS this unit also protects valuable computer & IT systems from power spikes and voltage/frequency fluctuations that other systems may not cope with.
